

Reference of Recommendation

May 21, 2009

Peter Sanderson, of The Sanderson Group, was commissioned to construct a new themed stage façade at Dracula's on the Gold Coast. They created two sculptured stage sets, a shipwreck, large Baroque frame and other items for the production of Vampirates.

The work was created and installed precisely to the original design. On the money, on schedule and above expectations.

Peter Sanderson maintained a highly professional approach, very accommodating of our limited time frame and keen to meet Dracula's high expectations.

On behalf of the Directors of Newman Entertainments, I highly recommend Peter Sanderson's talent and reliability.

Regards

Marc Newman
