

SANDERSON GROUP

Introducing our Organisation

Sanderson Group was Australia's first specialty theme construction and theme fabrication company, and has dominated the Australian market as the company of choice by the industry professionals, holding the no. 1 position in Australia for the past decade.

Based on the Gold Coast, Queensland, the company has successfully completed contracts throughout Australia and the world. The company has participated in every prestigious theme project in Queensland over the last decade.

Sanderson Group's goal is to assist clients to build value-added attractions and to increase their market share through improving their financial performance based on high quality theme entertainment.

Our Product

Sanderson Group provides a full range of services from design through to installation and management:

- The company's design team identifies opportunities and constraints
- A fully equipped in-house design department provides the latest computer aided design and imaging along with traditional design techniques
- A fabrication facility is fully equipped with state of the art manufacturing production equipment
- The company has been acknowledged as the pioneer of the EPS and structural Polyurethane Construction system for Theme and Architectural Theme Building facade technology.
- This technologically superior product can be seen in projects such as the Stock Exchange Building Indonesia, the Fontana Water and Theme Park in the Philippines, and the Main Street of Warner Bros Movie World Germany.
